

SWAGELOK® HOSE ADVISORY SERVICES

Engineered to take the pressure off you.

Unplanned downtime.
Repeated hose replacement.
Loss of profits.
Safety incidents.

Failed hose assemblies require time and resources you just don't have. It's better to be prepared by taking a preventative approach. Let Swagelok Hose Advisory Services help. From reduced maintenance costs and extended hose life to increased safety.

We are here to take the pressure off you.

Swagelok

Our Hose Advisory Services (HAS) can help you:

Increase Safety

Keep your plant and processes safe, predictable and dependable with leak-tight products and best practices to reduce the risk of injuries and environmental damage.

Reduce Plant Maintenance Costs

Prevent costs associated with continuously replacing the same problem hoses, unplanned downtime and wasted product.

Drive Facility Efficiencies

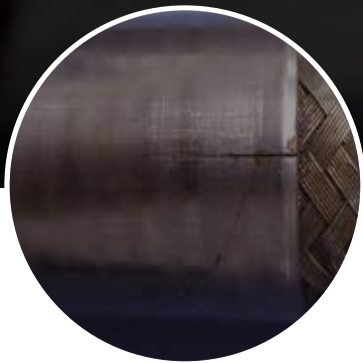

Save time and resources while being able to focus on more pressing priorities.

Master Hose Maintenance

Better predict when systems will need attention and understand what steps are necessary to keep everything running smoothly with a customised preventative maintenance schedule.

Extend Hose Life

Save money through proper hose selection and installation, an optimally routed hose and end connection combination will have a longer life.

End Connection Damage

Excessive Cover Damage

Kinked

What to expect from our Hose Advisory Services:

- A thorough discussion of your facility's goals
- A visual analysis of all hose systems
- A detailed, expert-reviewed report containing:
 - Overall findings
 - Prioritised improvement recommendations and suggestions with replacement option
 - Preventative maintenance schedules and hose inspection recommendations for your specific facility
- A hose register update with our survey findings or creation of a new database, depending on your facility's needs.

Contact your local authorised Swagelok sales and service centre today to schedule a consultation.
